### How did you learn about this event?

Answered: 15 Skipped: 0

### Overall, how would you rate the expo?

Answered: 14 Skipped: 1

### How likely are you to attend the expo next year?

Answered: 15 Skipped: 0

## What were the 3 main areas of interest that brought you to the expo?

Answered: 13 Skipped: 2

### What worked well (includes feedback collected on the day)?

- 100% stallholders happy to return next year.
- The Courier advertising
- Lovely people Well organized
- Good range of stalls
- 60 kids visited kids stall
- Everything
- The excellent tea & coffee in mugs that were washed and re-used (Wash against Waste)
- Having children's activities so parents could move around and talk to people
- Having a marquee set up for when I got there - thankyou so much for this.
- Good number of sites
- Well staffed and organised, and obviously well advertised, plenty of space to park and expand the event if required
- The layout and atmosphere.
- Quality of new enquiries
- The range of stallholders and products, the relaxed (community) feel of the event.
- easy to get around , stalls easily accessed

### What could we have done better (includes feedback collected on the day)?

- Quiet busker
- Bigger middle seating with umbrellas
- Cold water for drinking More food stalls, popcorn
- More signage at the roundabout
- Support for stallholders-drinks etc
- Have more variety of stall holders
- Maybe more food stalls so more variety
- The rest of the oval could have been mowed, looked a bit scraggly. Spread the sites out a touch more and give them slightly larger sites
- More shelter/shade and seating A few more food and drink options
- More marketing to bring people from surrounding and outer areas
- Broader takeaway food and cool drink options.

- Places in the shade to sit (with maybe a few chairs?)
- Things to entertain pesky (**older**) children who make it difficult to stay for ages. Maybe they could do something with recycled materials?
- More stalls
- More variety in food stalls
- Signs
- More food and more places to sit and relax
- Greater variety of food
- It would have been interesting to have had some demonstrations like mud brick building or pise or strawbale

### **What other stallholders would you like to see next year?**

- Indigenous plants,
- Smoothies
- More "green" building products - both local and Melbourne...ie Livos paints, Timbercrete blocks, radially-sawn timber, etc...
- EcoMaster
- ice cream :)
- Maybe greywater systems
- New earth Systems –
- Definitely Provenance Wines!
- More gardening stuff (drought tolerant food-producing plants that are suited to the area etc)
- More food vendors selling interesting foods (loved the labne lady!)
- more building products more green building more local providers ie within 20km
- more local food producers
- Organic apples, or other organic fruit and veg stalls.
- cannot think of any
